GENERATOR SET WARRANTY & WARRANTY SERVICE POLICY

Limited Warranty on Advanced Dynamo Industries Generators

Advanced Dynamo Industries, Inc. (hereafter ADyI) warrants to the original purchaser, that each generator of our manufacture is free from defects in materials and workmanship. That each generator will deliver its rated output as indicated on the ADyI nameplate. This ADyI generator warranty shall be in force as long as the following prerequisite conditions are met; that the generator is installed by ADyI or properly installed by an ADyI authorized installer, that the generator is properly serviced and maintained with a record of service, and that the generator is operated under normal conditions in accordance with ADyI's operational instructions. Improper or lack of maintenance of the generator will automatically void this warranty.

ADyI warrants the model 416 Series gasoline Generator Set for one year from the time of installation or 1,000 hours, whichever comes first. **ADyI requires the completion and return of the attached ADyI Warranty Registration Sheet.** Please keep a copy of the completed Warranty Registration Sheet for your records and for future reference.

ADyI must be contacted prior to initiating any repair based on a warranty claim that seeks a labor reimbursement from ADyI. After evaluation of the problem, ADyI will authorize and issue a capped purchase order to the service center for the labor and parts required to complete the repair. Currently, ADyI has a labor flat-rate warranty reimbursement of up to \$75/Hr., not to exceed \$300. Please direct the service center to contact ADyI early in the diagnostic phase, prior to any work, as ADyI will assist the service center in diagnosing the problem(s) correctly.

ADyI charges COD for all repair parts sent out to a service center. ADyI will then issue a credit for the defective parts after they are returned to ADyI for warranty evaluation and determined to be defective. The determination of whether a part is defective or not is solely at ADyI's judgment and discretion. **ADyI will not reimburse any unauthorized repairs** (unauthorized repairs are when no ADyI Purchase Order is issued).
